## EDUCATION

<b>The Federal Polytechnic, Ilaro</b> <i>Higher National Diploma in Computer Science</i>	<b>November 2023</b> <i>Ogun, NG</i>
• Relevant Coursework: Object Oriented Programming, Software Engineering, Computer Architecture, Statistics	

  

<b>The Federal Polytechnic, Ilaro</b> <i>National Diploma in Computer Science</i>	<b>December 2020</b> <i>Ogun, NG</i>
• Relevant Coursework: C Programming, Java Programming, Data Structures, Algorithms,	

## CERTIFICATIONS

Introduction to Front-end Development with ReactJS – Coursera  
Programming for Everybody (Getting Started with Python) – Coursera

## EXPERIENCE

<b>Parcels Mart Solutions</b> <i>FullStack Developer</i>	<b>Sep 2024 – Dec. 2024</b> <i>Remote</i>
• Developed and maintained a scalable logistics platform using Next.js, Node.js, and PostgreSQL, enhancing performance and reliability.	
• Implemented RESTful APIs and GraphQL for real-time shipment tracking and order management, reducing latency by 40%.	
• Optimized database queries and indexing strategies, improving backend efficiency and response times.	
• Automated deployment and CI/CD workflows using Docker, GitHub Actions, and cloud-based infrastructure, achieving zero downtime.	
<b>Hass Capital</b> <i>Frontend Developer</i>	<b>Feb 2024 – May. 2024</b> <i>Remote</i>
• Built dynamic loan application forms using React, TypeScript, and React Query, reducing application time by 25%	
• Improved loan management UIs in collaboration with designers, enhancing the user experience.	
• Integrated frontend components with backend APIs, boosting reliability and application success rates by 15%	
• Enhanced UIs based on user feedback, improving order management workflows and user satisfaction.	
<b>The Federal Polytechnic, Ilaro</b> <i>FullStack Developer</i>	<b>Nov. 2023 – August 2024</b> <i>Ogun, NG</i>
• Built a Django-based timetable system that reduced scheduling conflicts by 50%	
• Automated hall allocation and seating arrangements, optimizing resource utilization and improving exam administration by 40%	
<b>McWale Store</b> <i>Web Developer</i>	<b>Apr 2023 – July. 2023</b> <i>Remote</i>
• Developed a fully responsive e-commerce platform, increasing user retention by 25%	
• Optimized page load times by 35%	
• Integrated Google Analytics to track campaigns, contributing to a 40%	

## PROJECTS

---

### **Hono API Starter Kit** | *Hono, TypeScript, Bun, Drizzle ORM*

- Developed a lightweight and scalable API starter kit using Hono and Bun, providing a seamless backend development experience.
- Implemented authentication, database migrations, and optimized request handling for high performance.

### **Horizon Finance** | *React, Tailwind, Next JS, Hono, PostgreSQL, Drizzle ORM, Clerk Auth.*

- Developed a financial transaction tracking application for real-time monitoring and analysis of financial activities.
- Provides a clear dashboard for tracking expenses, and income.
- Syncs with financial institutions for instant transaction updates and automatic categorization.

### **Modifico** | *React, Tailwind, Next JS,*

- Developed a multimedia conversion platform that empowers users to convert images, audio files, and videos with complete flexibility.
- Enabled seamless transformation of multimedia files, expanding users' creative possibilities.

## TECHNICAL SKILLS

---

**Languages:** Golang, Python, SQL, JavaScript, HTML/CSS, NoSQL

**Frameworks:** React, Node.js, Django, Tailwind CSS, SCSS, FastAPI, Next JS, Express JS

**Developer Tools:** Git, Docker, VS Code, Github

**Libraries:** Pandas, NumPy, Matplotlib,
